Federal Acquisition Regulation

- (3) For the reporting requirement at 25.004, the only criterion is whether the place of manufacture of an end product is in the United States or outside the United States, without regard to the origin of the components.
- (4) When using funds appropriated under the American Recovery and Reinvestment Act of 2009 (Pub. L. 111–5), the definition of "domestic manufactured construction material" requires manufacture in the United States but

does not include a requirement with regard to the origin of the components. If the construction material consists wholly or predominantly of iron or steel, the iron or steel must be produced in the United States.
